

Counting Clovers

Try the Count On, June Bug! counting rhyme:
"Start the fun with one!
Ooo, there's two! Whee, there's three! And one more is four!"

With help from her friends, June Bug counts the number of clover leaves!

Directions: Count the number of leaves on each clover, giving each leaf its own number and touching each one as you count. Then, collect small objects like erasers, pebbles, or acorns. Place one object on each of the clover leaves, counting as you go! Compare the clovers. Which clover has the most objects? Which clovers have the same number of objects?
