The Peg + Cat Doodle It Yourself Flipbook

So one day Cat and I were making all these drawings of us. We stapled them together to make a book. And we flipped the pages. And it looked like we were moving! Like in a cartoon! Weird, right?!

Anyway, you can make a cartoon with your own drawings too! Follow these simple steps, and you'll be flipping out for your own flipbook in no time!

1. Print out the flipbook pages. You need just 2 sheets of printer paper for each flipbook. Thicker paper works best, but regular printer paper will work too.
2. Draw your flipbook animation in the boxes, starting with the box marked 1 through 24. For the animation to work best, your pictures should change gradually from one page to the next.
3. Cut out the small flipbook pages along the dotted lines.
4. Stack the flipbook pages in order from 1 through 24. The page marked 1 should be on top.
5. Once all the pages are in order, staple them together. Put the staple along the left edge of the book.
6. Use your thumb to flip through the pages and see your drawings move!
