

# Dice Roll Exploration

Create your own Odd Squad Dice by following these directions. Print this page and cut out the template following the dashed lines. Next add dots or other fun shapes to show a different number from 1 to 6 on each of the squares of the template. Fold along the solid lines to create 8 tabs. Glue or tape the edge of each tab to another edge to create a cube. To make a pair of dice, print another template and repeat.
